- * Dimensions NFB I : 300 x 300 x 117 mm.
- * Dimensions NFB II : 430 x 430 x 117 mm.
- * Colour: dark gray

Colours:

The NFB® is an essential accessory for your music audition room or studio control room.

This quite inexpensive piece works miracles on your room's sound. It minimizes the propagation of physical vibrations to the pieces installed on the workbenches, which also end up playing and vibrating thus causing spurious noises.

The innovation of the NFB's drawing consists on the possibility of adjusting the vertical angle from the speaker's position to the audition "sweet spot", thus adding one more important benefit to this accessory.

All these benefits will thus allow you to optimise the sound of your room. You can position this piece in relation to the monitors and reduce the unwanted vibrations.

This accessory is meant to be used in "nearfields". The two existing sizes, NFB®1 and NFB®2, adjust to most models of this type of speakers.
