

Acoustic Treatment Pack

PYRAMID®

Diffusion Panel

This is an acoustic panel that combines diffusion and absorption features for the acoustic music industry. The ATP® PYRAMID® combines hemispherical acoustic diffusion and absorption and is the most balanced element of our catalogue. It was specifically designed to be applied on the continuous areas of walls and ceilings. This panel can be set on T-Ceilings or glued on walls and ceilings.

This design was based on a quadratic shape with flat absorption surfaces made of acoustic foam and on curved diffusion surfaces made of EPS which give it an aural and visual performance of superior balance.

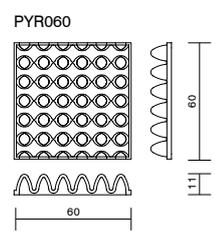

Features:

- Diffusion average: 0.45 / m2 [> 100 Hz; < 5 KHz].
- NRC average: 0.75 / m2 [> 250 Hz; < 10 KHz].
- EPS Euroclass fire-retardant (NP EN 13501-1).
- Self-extinguishable M1 fire-retard acoustic foam.
- Package: 4 units or 12 units.
- In stock for immediate delivery.
- T-ceilings ready applications.
- Very easy to install.
- Contact us for information on applications.
